

## SUMMARY

I specialize in Javascript using Angular, React, and Node technologies, striving for a comprehensive 360° perspective in every project to deliver high-performance solutions. I have a proven track record of contributing to large-scale applications for diverse clients and private organizations. Beyond technical proficiency, I excel as a collaborative leader, emphasizing transparent communication and data-driven decision-making to drive project success.

# LUIS AGUILAR

## FULL STACK DEVELOPER

## EDUCATION

Self Taught Programmer

2022 – current

I have acquired skills in technologies such as React, Angular, NestJS, SQL, and MongoDB. My focus was on Javascript for web development using a stack of RESTful microservices, implementing security strategies, JWT authentication, and optimizing software speed and scalability. My continuous learning has enabled me to acquire a solid set of technical and practical skills.

Economics

2006 – 2011

Universidad de Carabobo.

## PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER

Prexto, México (Feb-2023-Present)

Collaboratively developed a financial model to calculate moratorium and ordinary interest rates, initially modeling the calculations in Excel and later implementing them in JavaScript following best practices. Worked closely with the finance team to ensure the accuracy of the implemented model. This improved both the precision and efficiency of the financial calculations for our clients. Built new features and fix bugs.
